

Math Classwork Week of 6/1

- 1) Mickey and Goofy were building a dog house for Pluto. Mickey thinks they will need wood that is 5 feet long to make the dog house. Goofy thinks they will need wood that is 5 yards long. Who do you think has the best estimate? *Think about how long a foot is, how big a yard is, and how big a dog is.
- 2) Jonah wanted a Dinosaur book from the library. At the library, there were 5 shelves, and on each shelf, there were 3 dinosaur books. Jonah decided to check out 4 of the dinosaur books. How many books were left on the shelves?
- 3) Olivia and Naomi were collecting data and asking the 2nd grade class what their favorite restaurant is. Below is the data they collected. Use the data collected to fill in the bar graph.

Favorite Restaurants	
Chili's	6
Olive Garden	3
Monterrey Mexican Restaurant	2
Chick-fil-a	10

4) How many total tens are in the value 678?

A) 678

B) 7

C) 70

D) 67

5) There are 3 tricycles. Will that be an even or an odd number of tires? *Think- One Tricycle has 3 tires. How many would be on 3 tricycles?*
